How to backup configuration file on HPE 1920S Switch.

1. Login to HPE 1920S Switch.
2. Select "Maintenance"
3. Select "Backup and Update Manager"
4. There are three ways of installing the Backup file.

   a.

5. In this example, I have used HTTP as a Transfer Protocol. For updating/installing the Backup file, select HTTP "Update: *Transfer a file to the Switch*".

   a.

6. Select File Type: Backup configuration. Choose File from known destination. Select "Digital Signature Verification" and click "Begin Transfer".

HTTP Update File

File Type	Backup Configuration ⬍
Select File	Choose File backup-config-2
Digital Signature Verification	◼
Status	Transfer completed

⤒ **Begin Transfer**

Close

a.

To verify whether you have installed the right Backup file, follow the instructions below.

1. On the same page, Maintenance > Backup and Update Manager, select HTTP "Backup: *Transfer a file from the switch*".

HTTP Backup File

File Type	Backup Configuration ⬍
Status	

± **Begin Transfer**

Close

a.

2. Select File Type: "Backup Configuration" and click "Begin Transfer".

HTTP Backup File ✕

File Type	Backup Configuration ⇕
Status	Transfer completed

⬇ **Begin Transfer**

Close
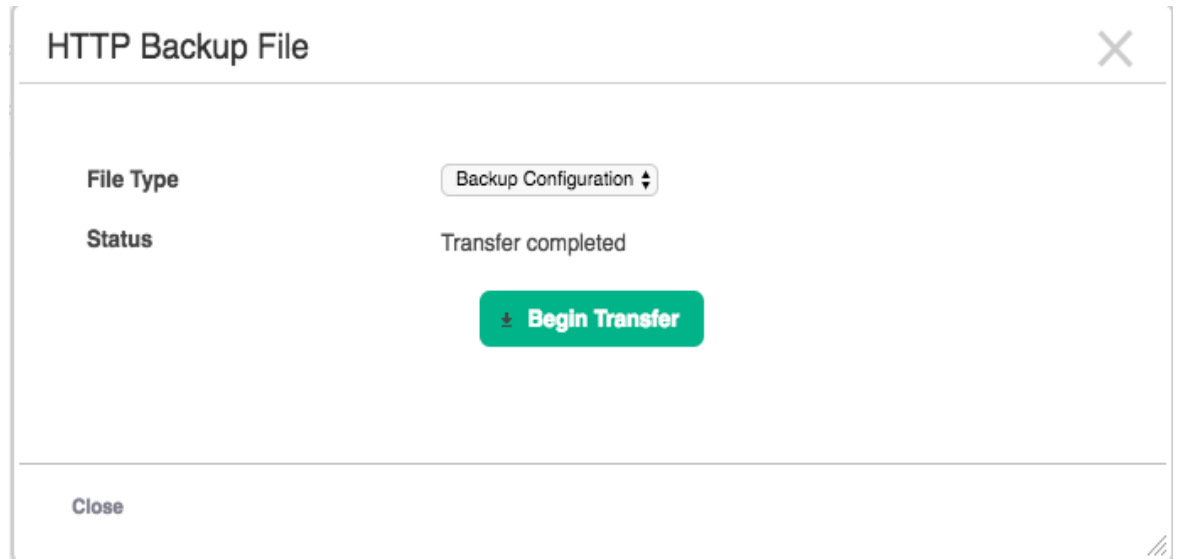

a.

3. Open the downloaded file to verify your "Backup Configuration".

Backing up the configuration file is now complete.
