This chapter provides a brief summary of the new features and enhancements introduced in the previous releases of ClearPass QuickConnect.

Enhancements

Support for Aruba EAP-GTC Plug-in

QuickConnect supports installation and configuration of the EAP-GTC (EAP Generic Token Card) plug-in on systems running Windows OS.

Support for Barnes & Noble Nook Tablets

QuickConnect now supports configuration of Barnes & Noble Nook tablets.

WPA with AES Support

QuickConnect now supports WPA-AES encryption for security settings.

This chapter provides a brief summary of the issues in the previous releases of ClearPass QuickConnect.

Fixed Issues in QuickConnect 2.0.3

Bug ID	Description
10446	<p>Symptom: ClearPass QuickConnect user interface did not load with Internet Explorer (IE) 10.0. This issue is now fixed and the WebUI page now displays correctly with the IE 10.0 version.</p> <p>Scenario: The issue was observed when users logged into the QuickConnect user interface https://quickconnect.arubanetworks.com using the IE 10.0 version, after successful login, the WebUI did not load completely.</p>
21119	<p>Symptom: The QuickConnect Windows wizard displayed the Connect and Finish buttons after provisioning was completed. Clicking Finish at this point caused the wizard to exit and made the user to disconnect from the network. In QuickConnect 2.0.3 release, the wizard checks if the provisioned SSID is available at the location where the device is being provisioned and shows only the Connect button if the SSID is available. If the SSID is not available, the wizard shows only the Finish button which makes the wizard to exit. The user can connect to the SSID later when the SSID becomes available.</p> <p>Scenario: In the previous QuickConnect release, the Finish button was added for off-site provisioning. Using the Finish button, the user could exit the wizard after provisioning was completed without trying to connect to the network.</p>

This chapter provides a brief summary of the new enhancements and fixes introduced in this release of ClearPass QuickConnect 6.4.0.

Fixed Issues

Bug ID	Description
25045	Fixed an issue where QuickConnect provisioning failed on non English Windows systems where virtual interfaces were present.
25324	Fixed an issue on the installation of additional applications on Windows 8 systems.
25330	Fixed an issue where the existing network configurations could not be changed and saved.
